Ashley Sum

San Francisco, CA | (415) 688-0470 | ashleysumtzele04@gmail.com | linkedin.com/in/ashley-sum | github.com/ashleytzele | ashleytzelesum.com

Education

San Francisco State University — San Francisco, CA
B.S. in Computer Science | GPA: 4.00 | Dean's List: Spring 2025, Fall 2025, Spring 2026 — *Expected May 2028*

Experience

Software Development Engineer Intern — Jun. 2026 – Aug. 2026
OSPIT Mobility Sdn. Bhd. — *Selangor, Malaysia*

- Built **Python** sync keeping one permanent asset code in step across **Odoo**, traffic-management REST APIs, and **OpenNMS** for **391 highway devices**, with **0 duplicate codes** and dry-run-by-default writes.
- Implemented fault correlation that turned **248 open outages into 24 tickets** (8 network segments, 16 devices), about **90% fewer**, and ran it on production **Odoo** with re-runs raising no duplicates.
- Traced dashboard reporting **322 of 393** asset codes as malformed to 4 conflicting validators; unified them into one with a selftest, correcting count to **26**.
- Built CAD-to-map plugin that converted engineering drawings into interactive Rest & Service Area (R&R) directory covering **6 highway service locations**.
- Developed configurable **Odoo POS** print gateway emulating Epson ePOS printer, routing jobs from POS terminals to **3 thermal-printer models** and enabling printers priced **56–77%** below Epson equivalents.

Projects

GatorPath | *Python, React, TypeScript, FastAPI, Docker* | GitHub · Live Demo — Oct. 2026 – Present

- Built and deployed a full-stack AI degree planner using **React**, **TypeScript**, and **FastAPI**, integrating **18 MCP tools** for course search and academic planning.
- Encoded 2026-27 requirements for **108 majors** as page-cited YAML with deterministic planner and plan verifier; **0 hallucinated course codes** across 47-question eval on 3 AI clients.
- Cut tool-result size **53%** (about 38K to 18K tokens) and tool calls **20 to 10** on Claude Code by measuring each tool's output and fixing largest first.
- Wrote **956 automated tests** and eval harness; deployed on **Fly.io** with Docker and GitHub Actions CI; capped AI cost with per-address rate limits and fixed spoofable-header bypass found in self-review.

SplitWise | *Python, Flask, SQLite, Chart.js, Render* | GitHub — Jun. 2025 – Sep. 2025

- Built full-stack **Flask** web app for competitive swimmers to analyze 50m sprint splits, velocity, and stroke rate with interactive **Chart.js** dashboards, personal-best tracking, and side-by-side swim comparison.
- Implemented login, **SQLite** session storage, and mobile-responsive layout; shipped live on **Render**.

Quorum | *Python, Flask, Supabase, OpenAI API, pytest* | GitHub — Jul. 2026 – Aug. 2026

- Developed Python engine turning meeting transcripts and notes into templated minutes with **GPT-4o-mini**.
- Built local **Flask** bridge (health, recordings, generate, generate-audio) connecting web app to engine; switched to **Whisper large-v3-turbo**, cutting transcription time 5-8x.

Scoutmini | *Python, OpenAI API, pytest* | GitHub — Jun. 2026 – Aug. 2026

- Built **Python** CLI where **GPT-4o-mini** writes F1 reports citing only fetched **Jolpica-F1 API** data.
- Wrote **73 pytest tests** with every external call fixtured, so suite runs offline.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C++, HTML/CSS
Frameworks & Libraries: React, Node.js, Express.js, FastAPI, Flask, Tailwind CSS, Chart.js, Android SDK
Tools & Platforms: Git, GitHub Actions, Docker, Fly.io, Render, Supabase, SQLite, MongoDB, REST APIs, Odoo, MQTT, Claude API, OpenAI API, pytest
